Dont buy this game. what is this crap.. its alright if you're really bored my biggest complaint is that 90% of all sounds in this game are completely stolen from oblivion go play oblivion for 20 minutes then play this, not a single original sound. dont waste your money. Even with Steam support this game will launch and then crash.. THIS ONE IS EVEN BETTER THAN THE FIRST! IT CRASHES EVEN HARDER, MAKING IT EASILY TWO TIMES THE GAME.. I can honestly say that this is the only game I have ever played which has left me truly speechless.. Not itself a bad game, just, as you play it several things will jump out at you as annoying. Voice acting and sync with the cutscene animations are awful. Combat was uninspired - just hack and then roll away. But the most annoying part for me was the camera angles are all auto. This made playing with the keyboard

really hard, as I'd be traveling a direction, then the camera would rotate, and the direction I was going now leads me right off a cliff (several times). Got my gamepad working and tried again, and the play was a lot better. Graphics and environments are very good. While I can't recommend the game (maybe it was a 4/10), if on-the-cheap gaming is your thing, it's worth a spin.
