About This Game

Hard Karma is a dream sort of. Attempt to make the game without most of the negative things in games and with positive ones. What comes to mind when you hear "MMO"? For me - great waste of time in attempts to figure out the game mechanics and a huge dose of grind. And near zero fun. But the best thing about "MMO" is communication with other players and all the fun that comes with playing the game with real people side by side.

The essence

Fight together against strange and extraordinary bosses in dynamic gameplay for epic loot and fun in action PRG shooter. Half MMO, half - roguelike - brings the new gameplay.
