I mean its not a bad game by any means but there is a game out there called stepmania, which is basically this and its free. you can also download songpacks for that game for free. Stepmania is also way more precise as the timing window is much smaller and it has a cleaner looking UI.

It also dosent do that choppy sound thing when you press on the keys durring the song.

Not a bad game by any means, that being said go play stepmania. Firstly, one very important thing to consider here is that the game is "Early Access" and so not yet completed as determined by the developer(s), with that in mind some of the reviews complaining about it's lack of functionality or the state of it's current functionality can be disregarded as rubbish from illiterate gamers. Do not let these reviews sway your own opinion on the game as time goes on.

Onto the game itself, I have found it to be an interesting concept and I am open-minded for the future. I like the genre and style of the game, being different than big names like Civ or Total War with the apocolyptic and scavenging feel, while a nice similarity with different victories.

Not to mention it's very cheap currently, pick it up and try it!. It is a very good expansion. Of course it is not perfect, we have only one new architecture style, and not five but four new civs. One thing I am very glad about is that campaigns are voiced in this expansion. Also water battles were somewhat boring before but now they are more interesting. Overall as said before it is a good expansion.. A very funny and enjoyable Point & Click that's definitely worth playing for anyone who enjoys the genre.

Pros:

- Very funny
- Good voice acting
- Good background music
- The songs at the start of each chapter are great
- Interesting story

Cons:

- No in-game hints system
- There were multiple spots where I never would have figured out how to proceed without a walkthrough. Thankfully using a walkthrough doesn't completely ruin the experience, but as always I recommend using one only when you get stuck.
- Droggeljug

Verdict: 9/10. afk for cards. It's♥♥♥♥♥. Roguelike + Kingdom Management. Don't let the ASCII scare you away! It's a pretty fun game, pretty complete when it comes to management, you can basically do anything you imagine. Developer seems cool on the boards and updates it regularly, so i would totally advise you to try it out if you like text based games, specially since it's on sale atm.

If you wish to try a demo, theres one in reddit, check for the link in the steam boards!. \u514d\u8d39. A short story, feeling like a good one at the fireplace in the winter night.

Too much grinding on the late levels.  
. Lets start off with a few things straight.  
Graphics look like a high school project.  
Voice acting on par with the toaster located in my kitchen.  
Stairs lots of them.

What more could i possibly say about this life changing experience that hasn't already been said about the masterpeice known as SCP-087: Recovered document, My life hasn't ever been the same since i've experienced this game all i could say is thank you, Thank you Korovkin Nikita for blessing these cursed lands with the holy grail of SCP-087: Recovered document.
