create responsive grid with css and javascript web design css framework timothy css frameworkYahoo News reports on a back-and-forth between the Bush and Obama administrations over which agency should handle the delivery of body parts from the Iraq and Afghanistan wars. Which agency will be in charge of delivering body parts from the wars in Iraq and Afghanistan? The Obama administration's Office of Defense Cooperation announced today it had won the right to accept human cadavers for scientific studies. But the Pentagon rejected that concession as "procedural" and instead took control of the shipment from the Defense Department's Armed Forces Institute of Pathology (AFIP). Bush administration officials, including Presidential Counselor John Podesta, are angry about what they consider a rude and ungrateful snub. Defense officials claimed the agency that already organizes the delivery of cadavers needed to be in charge of the distribution because that is its mission. "It was a minor procedural point," said [Pentagon spokesman Bryan] Whitman, in an interview. "They have nothing to do with Iraq. They have nothing to do with Afghanistan. The war on terror is over. They have their own responsibility." This is an outrage! Human bodies that are being delivered by the U.S. Armed Forces for the advancement of knowledge ought not be politicized by a group's role in a different, immoral activity! Aides said the administration's major frustration was that the AFIP decision to relinquish control of the cadavers took them by surprise. The White House views the AFIP as a bureaucratic redoubt created under the old regime by the Defense Department to slow the flow of data into the Pentagon and to protect the services from budget cuts. That is wrong! That is just wrong! The very nature of our country requires the allocation of funding and the distribution of resources in order to meet the need for this knowledge. Sharing body parts is a necessary part of fighting the war on terror, and the entire country should view the delivery of body parts as something that ought to be shared! Defense officials said they were discussing with the administration's Office of Management and Budget a way of funding the AFIP, which currently gets less than \$1.2 million a year from the Pentagon. This is totally wrong! The U.S. Armed Forces should not be given the burden of such a funding effort in addition to
