

For those who love to share their gaming experiences with family and friends, but also want a way to record their gameplay on a video, this free download is perfect. It doesn't matter what type of device you have either because it works on both PC and MAC computers. The user interface is very simple and easy to follow as well as edit the settings by clicking the small gear icon in the top right-hand corner of your screen. You can do everything from set up multiple different scenes for later use or even frame rate, size, file name length etc... from the picture above. Most people have two types of recording software on their PC, Windows Movie Maker or Adobe Premiere. Both these programs have a free version that allows you to take a few clips and then you need to upgrade to a full version for advanced editing and video editing. Screen Video Recorder has an advanced interface that allows you to go from one scene mode to another simply by hitting the corresponding button on your keyboard/mouse or click & drag your mouse around to set up multiple scenes. This product is perfect for those who want to record gameplay, capture video tutorials and more. Most of us use screen capture software such as Smooth Screen Capture, Cool Screenshot Pro etc... but never want to record any sound while doing so. If you want to just capture the screenshots and videos on your computer's screen without any sound, then Screen Video Recorder is for you. This little tool can capture everything on your screen, even the mouse cursor movement, windows appearing on the desktop etc... so you can even use it as a full PC monitoring software. It is designed specially for gamers who love to share their fun moments with their friends on YouTube or Twitch.tv etc... But sometimes they do not know how to record gameplays with decent quality and resolution. This free download is absolutely free of charge and allows user to record gameplays in high definition with 100% quality of the game screen (No lag or distortion). You can also record your gameplays, using this program, without having to use annoying software such as "Screen Recorder" or other similar products. The video files are saved in .AVI format which allows you to edit them with your favorite video editing programs. It is a very useful software for School/College teachers who want to share their lectures videos on YouTube, Vimeo etc... But they don't know how to record the lectures at the best quality. This free download is designed specially for them and allows user to record videos at high definition or even 1080p HD. For all types of devices the sound is recorded in high quality stereo. This free download is best suited for novice users who may not have much knowledge in editing videos or in any other technical aspects related to video sharing. One can record their video's on their PC or Mac with the highest framerate and also at the highest possible resolution of your screen. It doesn't matter what device you are using, so PC, Mac or even mobile phones etc... A new wave of Mini-Cams has appeared which allow you to Webcam your video blogs on your smartphone or cell phone right into YouTube using that service, without the need to use any software program of any kind.
